

AQUAPAC 228 SMALL CLASSIC

The original and most trusted waterproof VHF case since 1983. This waterproof case suits satphones and radios with longer antennas.

FEATURES

- Clear windows on both sides so it fits both L- and R-handed radios
- You can use your radio normally through the case, it doesn't interfere with sound or radio signals
- Protection against water, dust, corrosion, sand and mud
- Like most of our cases, it'll float if you drop it in the sea
- The seams are high-frequency welded to form a super-strong bond
- The Aquaclip® seal protects and secures your VHF from the elements
- IPX8 - protected against continuous immersion to a depth of 10m (30')

COLOUR

Cool grey with acid green lanyard

MATERIALS

300mu UV-resistant TPU

WEIGHT

Pouch: 44g (1.6oz)

Lanyard: 7g (0.2oz)

This case is for walkie-talkies and very small handsets, it will fit most modern handheld VHF radios. The 248 large case is good for satellite phones and radios with long antennas.
