

AQUAPAC 229 VHF PRO

This is the case you'll see used by lifeguards and mountain rescue teams. The harness gives you the freedom to get on with the job at hand, in the most testing conditions. The original and most trusted VHF case on the market – since 1983.

FEATURES

- There are 4 lash points for the 3-way harness – wear your radio comfortably whatever you're doing
- The clever antenna design not only fits L- and R-handed radios but also creates an emergency grab handle
- You can use your radio normally through the case, it doesn't interfere with sound or radio signals
- Protection against water, dust, corrosion, sand and mud
- Like most of our cases, it'll float if you drop it in the sea
- The seams are high-frequency welded to form a super-strong bond
- The Aquaclip® seal protects and secures your phone from the elements
- IPX8 - protected against continuous immersion to a depth of 10m (30')
