

MEDICAL RESCUE METALUX 200G CASUALTY BAG

The Metalux Casualty Bag is specifically engineered for air ambulances, mountain rescue, and search & rescue teams requiring durable, lightweight, and thermally insulated rescue solutions. Its advanced construction ensures optimal warmth and comfort for casualties, even in extreme environments and when exposed to water. The Metalux outer shell, combined with synthetic resinous wadding and a tin foil thermal film, preserves thermal properties to protect individuals from the elements during critical rescue operations.

With an easy-access design, 6x two-way zippers, and built-in carry handles, this rescue bag guarantees swift response times while offering maximum comfort. The base features an integrated 8mm neoprene mat for extra support, and the red thermal fleece interior ensures warmth.

FEATURES

A tog rating of 4.3 for superior thermal insulation.
