

PRO-THROW BAG GUIDE BELT

Quick-release waist belt for mounting water rescue throw bags

The Pro-Throw Bag Guide Belt is a professional-grade quick-release system designed for fast and efficient deployment of throwlines during water rescue operations. Worn securely around the rescuer's waist, it provides easy access to the throw bag at all times while maintaining comfort and mobility in dynamic environments.

Built from durable 38mm (1.6") wide webbing with reinforced stitching, this belt ensures strength and reliability under load. The large quick-release buckle allows the user to instantly detach the belt when required, enhancing safety during critical moments.

A high-visibility orange webbing section and yellow toggle clearly identify the quick-release strap, ensuring it can be located and activated quickly, even in low-visibility conditions.

The belt offers a secure fit for a wide range of rescue professionals. Designed for versatility, it's compatible with 15m, 20m, 25m, and 30m throw bags, making it a dependable choice for all water rescue scenarios.

FEATURES

Quick release guide belt enables fast deployment of throwlines when every second counts. Easy access to throwlines keeps throw bags securely mounted yet readily accessible during operations. Large quick release buckle has a robust, easy-to-operate design for rapid disconnection under load or in emergencies. High-visibility safety features include orange webbing and yellow toggle make the quick-release strap easy to identify, even in challenging conditions. Durable construction, made from 38mm (1.6") reinforced webbing with heavy-duty stitching for long-lasting reliability. Universal compatibility, the belt works with 15m, 20m, 25m, and 30m throw bags. Professional-grade safety, developed for swiftwater, flood, and general water rescue operations.

SIZES

Adjustable fit is suitable for waist sizes 71-112cm (28-44")
