

(F6)

BUILT FOR THE EXTREMES OF WATER RESCUE

STORM FORCE 6

The Storm Force 6 (SF6) is the latest evolution in Northern Diver's water rescue suit line, building on the trusted SF4 and SF5. Engineered for tough environments, it delivers enhanced durability, comfort, and individual visibility where it counts.

Built from 375D heavy-duty tri-laminate fabric, the SF6 features a front entry dual zip system for quick and secure donning. Yamamoto neoprene seals, HD latex socks, and elasticated ankle gaiters provide comfort and a watertight fit.

High-visibility reflective bands are positioned for maximum effectiveness in low light or moving water. A telescopic waist system ensures enhanced flexibility and fit, while Velcro-close bellows pockets offer practical storage.

Duratex reinforcements at the elbows, knees, and seat deliver critical abrasion resistance in high-wear zones—making the SF6 a reliable choice for water rescue professionals.
