

3.2M NAVAJO WITH ALUMINIUM FLOOR

With a maximum capacity of 5 on 2 benches, the Navajo is a small but mighty option for a range of applications.

Compact and easy to manoeuvre, the Wren Navajo 3.2m boat can hold up to four people, with two benches and plenty of handles fitted. Oars are included, and it's possible to mount an outboard engine to the rear. The sturdy aluminium floor is simple to assemble, and the whole boat, once deflated, will fit into the handy carry bag.

Made from PVC fabric, the Leisure Series boats are lightweight and give guaranteed flexibility and reliability in all-weather conditions.

As well as a set of oars and a carry bag, you'll also receive an inflation and maintenance kit with the Navajo. Rapid inflation kits are also available.
