Operating in Warm Water Environments**

[ndiver-rescue.com](http://ndiver-rescue.com)

# RESCUE RECOVERY SEARCH OPERATIONS

Search, rescue and recovery operations in warm and tropical water environments demand equipment that delivers reliability, mobility and performance under pressure. Whether conducting rapid response missions, underwater searches, evidence recovery or prolonged diving operations, teams require proven solutions capable of performing effectively in challenging conditions.

Supporting emergency services and specialist dive teams, these systems combine effective exposure protection with dependable breathing apparatus, enhanced underwater lighting and efficient propulsion technologies. Designed for durability and ease of use, they provide the protection, visibility and versatility needed to adapt to changing operational requirements and maintain effectiveness throughout every stage of the mission.

When mission success depends on reliability, having equipment that can be trusted allows divers to focus on the task at hand and carry out their missions with confidence.

# ESR WETSUIT

## Emergency Service Response Wetsuit.

Our Emergency Service Response Wetsuit is a versatile option, but is particularly popular amongst Coastguards and other sea rescue organisations.

This high visibility orange suit is manufactured from superstretch neoprene, featuring a front entry YKK zip and moulded Velcro closing collar.

This suit can be supplied in 1.5mm, 3mm or 5mm thicknesses, allowing you to achieve the perfect level of thermal protection required for any given rescue scenario.

The 3mm and 5mm variants include protective zipped cuffs and ankles and each wetsuit is supplied with a matching separate highly visible hood.

Don't see what you're looking for? We can design wetsuit systems for all water rescue situations. Please contact the team to discuss your requirements.

### FEATURES

- Yamamoto neoprene neck, wrist and ankle seals with internal smooth skin
- Front entry YKK plastic zip
- Velcro closing comfortable collar
- Seams triple glued and blind stitched
- Bright orange superstretch neoprene
- YKK® zipped cuffs and ankles on the 3mm and 5mm versions only
- Strong pad/supertex elbow, knee and seat protection built into suit seams
- Reflective banding on arms and legs
- Separate hood supplied

### SIZES

S, M, L, XL, XXL

### THICKNESSES

# 4-WINDOW MASK

**Maximum Visibility. Secure Fit. Proven Performance.**

The 4-Window Dive Mask features a unique twin split lens design and 4-window construction, delivering an exceptional panoramic field of vision for enhanced underwater awareness. Its all-black configuration provides a low-visibility appearance, making it particularly suited to military, tactical and professional diving applications where a discreet profile is preferred.

Manufactured from high-quality surgical-grade silicone, the mask offers a comfortable, secure seal across a wide range of face shapes and sizes. The durable tempered glass lenses provide excellent clarity and reliability, while the ergonomic design ensures comfort during prolonged use.

## FEATURES

- Unique twin split lens design
- 4-window construction
- Enhanced panoramic field of vision
- Wide-angle visibility for improved underwater awareness
- Low-visibility all-black design
- Tempered glass lenses for strength and optical clarity
- Surgical-grade silicone skirt
- Soft, flexible skirt accommodates a wide range of face shapes and sizes
- Secure seal helps minimise water ingress
- Ergonomic design for comfort during extended dives
- Suitable for scuba diving, rescue operations and professional use

## SPECIFICATIONS

- Lens configuration: twin split lens, four-window design
- Lens material: tempered glass
- Skirt material: surgical-grade silicone
- Colour: Black
- Diving applications: Military, tactical, commercial, rescue and recreational
- Size: one, adjustable

# JET FIN

**Exceptional propulsion. Ultimate finning power.**

Our Jet Fins are manufactured from a very high quality rubber, using the latest manufacturing processes.

They are very weighty and robust - specifically designed for maximum endurance, exceptional propulsion and the ultimate finning power.

Manufactured from a very high quality of rubber, using the latest manufacturing processes. They have a great weight, are extremely robust and have been specifically designed for maximum endurance, exceptional propulsion and the ultimate finning power.

Originally developed for commercial and military use but due to their compact design, they are equally suited to wreck diving, cave dives and technical diver applications, where a shorter length dive fin is preferred. For many years, these diving fins have been the preferred choice of our military divers in addition to most commercial, technical and deep divers, around the globe.

**CLAMP  
BUCKLE**

#### **SUPPLIED WITH**

Traditional metal 'clamp' style fin strap buckles.

*Note: this style of fin is not compatible with Northern Divers Spring Fin Straps.*

#### **SIZES**

|      |         |
|------|---------|
| M    | UK 4-5  |
| L    | UK 6-7  |
| XL   | UK 8-9  |
| XXL  | UK 9-10 |
| XXXL | UK 11+  |

The listed fin sizes are for wetboots or standard width drysuit boots. For wide fitting drysuit boots, please select one size higher than your drysuit boot size.

FIN-JETFIN-SIZE

# SPRING STRAPS

Compatible with Jet Fins.

Upgrade your fins with our Spring Fin Straps with Metal Pins, designed to provide a secure, comfortable fit for a wide range of fins, including our popular Jet Fins. Featuring a marine-grade stainless steel spring and robust C-type buckle fittings, these durable straps deliver outstanding reliability and performance, even in demanding diving conditions.

Replace worn or awkward rubber straps with a convenient spring system that makes putting your fins on and taking them off quick and effortless. Ideal for shore entries, boat dives, and situations where speed matters, the stainless steel spring provides the perfect amount of tension to keep your fins securely in place without compromising comfort during longer dives.

A black moulded rubber sleeve protects your dive boots from unnecessary wear and prevents rubbing, helping to extend the life of your equipment. These versatile straps can be retrofitted to most fins, making them an excellent long-lasting upgrade for all.

## FEATURES

- Marine-grade stainless steel spring for exceptional durability and strength
- Secure C-type buckle attachment
- Black moulded rubber sleeve helps prevent wear and rubbing on dive boots
- Quick and easy to fit and remove, ideal for shore entries and rapid gearing up
- Compatible with Jet Fins and suitable for retrofitting to most fin models
- Sleek black finish, supplied as a pair

## SIZES

- Small - 22cm (8.7")
- Medium - 24cm (9.4")
- Large - 26cm (10.2")
- X-Large - 29cm (11.4")
- XX-Large - 34cm (13.4")

A simple, dependable upgrade that delivers improved comfort, convenience, and long-lasting performance on every dive.

# MARINE TREK

**Tough, warm, and ready for any water environment.**

The Northern Diver Marine Trek Wetboot is engineered for durability, comfort, and superior grip across a range of demanding environments, from recreational diving to military, rescue, and commercial applications.

Constructed from 5mm neoprene, these boots provide excellent thermal insulation while ensuring flexibility and comfort for extended use.

The rugged trainer-style sole offers exceptional traction on wet and uneven surfaces, enhancing slip resistance in high-performance situations. Reinforced rubber protection on the toe, heel, and sole increases durability, making these boots tough enough for the harshest conditions.

A zippered gusset with an anti-velcro lining ensures a secure and comfortable fit, preventing snags and irritation. The heel fin tab helps keep dive fins securely in place, making the Marine Trek Wet Boot a reliable choice for professional and recreational divers, water rescue teams, and commercial operators.

## FEATURES

- 5mm neoprene construction
- Built for warmth and flexibility
- Triple-glued, blind-stitched seams for enhanced durability
- Rugged trainer-style sole for superior grip and slip resistance
- Reinforced rubber toe, heel, and sole for impact protection
- Zippered gusset with anti-velcro lining for a secure, irritation-free fit
- Fin tab located on the heel for improved fin strap security

# 80L NDB10 KIT BAG

**Built tough for organised, reliable dive gear storage.**

Engineered for performance and durability, the Northern Diver Scuba Holdall (NDB10) is a rugged, high-capacity gear bag designed for both recreational and professional divers operating in demanding environments. Originally developed for military use, it delivers exceptional strength and reliability.

Constructed from ultra hard-wearing Cordura® fabric with corrosion-resistant zips, it is built to withstand harsh conditions while protecting dive equipment. The 80L main compartment is complemented by a dedicated fin pocket and separate end pocket, providing practical three-compartment organisation for quick and easy access to essential gear.

Designed for versatility, the NDB10 features heavy-duty top-mounted carry handles and a padded, detachable shoulder strap, allowing flexible transport options for any situation.

## FEATURES

- Military-grade design originally developed for military use
- Ultra hard-wearing Cordura® construction
- Corrosion-resistant zips for harsh marine environments
- Large 80L main compartment
- Dedicated fin pocket for streamlined storage
- Separate end pocket for accessories
- Heavy-duty top-mounted carry handles
- Padded, detachable shoulder strap for comfort and flexibility
- Multi-carry options for ease of transport
- Designed for both professional and recreational diving
- Custom branding can be added upon request

## SPECIFICATIONS

- Capacity: 80L
- Weight: 1.5kg (3.3lbs)
- Dimensions: 74\*32\*34 cm (29\*12.6\*13.4")
- Colour: yellow/black

# FLEXI-LIGHT

The modern alternative to chemical light sticks.

Northern Diver are constantly using feedback to enhance the evolution of our products, our new and improved flexi-light is no different. We have enhanced the prominence of the on/off switch to allow the user to more easily activate the light when wearing a thicker glove.

## OPERATION

Press 1. On / Constant Low/Half Power (40hrs burn time)  
Press 2. Constant High/Full Power (22hrs burn time)  
Press 3. Flashing (42hrs burn time)  
Press 4. Off

## SPECIFICATIONS

Output: 8 lumens  
Visible distance: up to 3km (1.9miles)  
Depth tested: 100 m (328')  
Double sealed construction  
Flexible silicone body  
+ IR (wavelength: 625-635 NM)  
RoHS Compliant Polyurethane  
Repeated use with on/off modes  
Size: 110\*25mm (4.3\*1")

Multiple fixing options depending on what your using the flexi-light for:

- Adhesive backed 3M™ tape
- Adhesive backed 3M™ foam
- 3M™ hook Velcro backing
- Nylon Flexi-Light Clip

## RANGE OF USES

- Military: covert ops
- Rescue teams
- Underwater: diving
- Outdoors: camping, dog walking, trekkers & hikers

## STYLES

- Colour: red, blue, white, green, yellow
- IR: infrared
- Multi-colour: red-green-blue-yellow

# VARILUX TRAVEL

**Compact. Powerful. Rechargeable dive torch.**

For both underwater and surface use. Delivering up to 2600 lumens, it offers simple one-button control with high and low brightness settings, providing up to 4.5 hours of burn time. Constructed from durable 6063 aluminium, the torch is lightweight, corrosion-resistant and built to perform in demanding environments. Its compact design makes it ideal as a reliable primary or backup light, while compatibility with wrist mounts and brackets adds to its versatility.

#### LIGHT SOURCE

- LED: 1 x XPH50
- LED Lifespan: 60,000 hours

#### PERFORMANCE

- Output: 2600 to 1300 lumens
- Burn Time: 2.5 hrs (High)/4.5 hrs (Low)
- Beam Distance: 210 m (689 ft)
- Beam Intensity: 12,000 cd
- Beam Angle: ~14°
- Colour Temp: 5700-7000K

#### OPERATION

- Switch: Single push-button control
- Brightness: 100% (High)/50% (Low)

#### CONSTRUCTION & DURABILITY

- Material: 6063 Aluminium Alloy
- Impact Resistance: 1 m (3.3 ft)
- Waterproof Rating: IPX8
- Depth Rating: 100 m (328 ft)

#### POWER

- Battery: 1\*21700/5000mAh
- Type: rechargeable
- Charge Time: 3.5 hours
- Charging Method: Magnetic USB

#### DIMENSIONS & WEIGHT

- Size: 150\*36\*36 mm (5.9\*1.4\*1.4")
- Weight (inc battery): 0.2 kg (0.4 lbs)

#### SUPPLIED WITH

In-built rechargeable battery, magnetic USB charge cable, lanyard and storage case

TORCH-VL-TRAVEL3

# FUSION X

**Compact. Powerful. Rechargeable dive torch.**

Engineered for performance in the most demanding underwater environments, the Fusion-X delivers exceptional brightness, durability, and reliability for divers, water rescue teams, and watersports professionals.

## LIGHT SOURCE

- LED: 3\*SST40 20W
- LED Lifespan: 60,000 hours

## PERFORMANCE

- Output: 4500 - 2500 - 1000 lumens
- Burn Time: 4.5hrs - 6.5hrs - 12.5hrs
- Beam Distance: 429m (1407') @1m (3.3')
- Beam Intensity: 48000cd @1m (3.3')
- Beam Angle: ~11°
- Colour Temp: 5700~7300k

## OPERATION

- Switch: Single push-button control
- Brightness:  
100% (High)/50% (Med)/30% (Low)

## CONSTRUCTION & DURABILITY

- Material: #6063 aluminium + polycarbonate
- Impact Resistance: 1 m (3.3 ft)
- Waterproof Rating: IPX8
- Depth Rating: 100 m (328 ft)

## POWER

- Battery: 3\*21700 / 15000mAh
- Type: rechargeable
- Charge Time: 5 hours
- Charging Method: Magnetic USB

## DIMENSIONS & WEIGHT

- Torch Size: 225\*60\*60mm (8.6\*2.36\*2.36")
- Weight (inc battery): 0.5kg (1.10lbs)
- Handle: 110\*63\*22mm (4.33\*2.48\*0.86")
- Handle Weight: 0.1kg (0.22lbs)

## SUPPLIED WITH

A detachable handle and lanyard for versatile handling, the Fusion-X is the ideal lighting solution for recreational divers, rescue operations, and professional applications alike.

# 3D OPTIMUM

**Tropical. 3D shaped. Zipped dive glove.**

Northern Diver's Tropical 3D shaped gloves are some of the newest gloves to our ever-expanding range, a moulded shape fit along with our Glideskin seal makes donning easy for the user. Factors complemented by the added security of a Long YKK® plastic zip with velcro closing zip tab - encasing an identity plate.

With pre-bent fingers, an anti-slip grip on the palm on fingers and a unique four-way stretch neoprene, the glove allows for fantastic mobility and less restriction than similar models.

Flat-locked stitched and triple glued seams ensure the durability and longevity of the glove is maximised to the fullest.

## FEATURES

- Great fit
- Improved mobility and less restriction
- Unique 4-way superstretch neoprene
- Anti Vecro outer finish
- 3D moulded shape
- Pre-bent fingers
- Long YKK® plastic zip
- Velcro tab for easy donning
- Glideskin seal
- High-grip anti-slip palm and fingers
- Flat-locked stitched seams
- ID plate on inside gusset
- Specifically designed for the Military

# SCADE

## Self-Contained Air Breathing Dive Set.

The Northern Diver SCADE™ Self-Contained Air Breathing Dive Set is a fully modular diving system designed and manufactured in the UK. It is engineered for operational reliability, simplified maintenance, and rapid reconfiguration between mission requirements.

As the sole manufacturer, Northern Diver controls the full production process, ensuring quality assurance, supply chain security, and long-term system support.

### FEATURES

- Modular system architecture
- Rapid configuration between mask variants
- Reduced through-life maintenance requirements
- Common parts and service kits
- Designed for demanding operational environments
- Human factors optimised (5th-95th percentile users)
- UK in-house design and manufacture

### CONFIGURATIONS

Configurable via Tool & Test Kit (TTK) to:

- Full Face Mask (FFM)
- Half-Mask Variant (HMV)

### PERFORMANCE & COMPLIANCE

Depth rating: 50 m (164')  
EN250:2014 compliant  
PPE Regulation (EU) 2016/425  
CE marked

### MANUFACTURING

Designed and manufactured in the UK  
Fully integrated production by N Diver  
Controlled supply chain for reduced operational risk

### FUTURE CAPABILITY

Designed for potential integration of telemetry and wireless monitoring systems.

# DT4

## Underwater Dive Thrusters.

A state-of-the-art wearable system offering military operators the advantage of battery powered underwater propulsion to enhance performance and reduce fatigue during missions. The Northern Diver DT4 Thrusters are a personal underwater propulsion system designed for Military combat swimmers.

Developed and manufactured in the U.K. by Northern Diver, our DT4 Thrusters are at the forefront of innovation. They offer hands free propulsion, via the latest technology, unrivalled construction and expert engineering, to effectively enhance performance and reduce fatigue during tasks, revolutionising combat swimming, reconnaissance tasks, search & rescue operations and inspection works.

### FEATURES

- 100m depth rating for professional underwater operations
- High-performance propulsion up to 4.8 kph (2.6 kts), with optional enhanced speed up to 6.44 kph (3.5 kts)
- Strong thrust output of 22.5 kg (50 lbs) for efficient diver towing and propulsion
- Extended range up to 4.4 nautical miles, or 15 km with dual battery configuration
- Long operational endurance: up to 420 minutes (variable power settings)
- Dual battery option for extended missions (up to 200 minutes at full performance)
- Lithium-ion power system with 5.5-hour fast recharge time
- Modular harness or belt system for flexible, ergonomic fit with diving equipment
- Lightweight thruster units (2.1 kg each) for improved handling and balance
- Customisable speed, thrust, and software settings for mission-specific use
- Manually controlled operation for precise diver input and handling
- Field-serviceable design with spare parts and maintenance support

## Surface Supply Equipment.

The 3-Diver Surface Supply Panel is a compact, high-performance breathing air distribution system designed for military and professional surface-supplied diving operations. Supporting two active divers and one standby diver, the system provides reliable high-pressure air delivery with independent monitoring and control for each diver. Housed in a rugged watertight case, the panel is built for harsh operational environments while remaining portable, durable, and deployment-ready.

### FEATURES

- Supports 2 active divers plus 1 standby diver
- Independent air supply control and monitoring for each diver
- High-pressure breathing gas delivery through reinforced HP umbilicals
- Dual-cylinder configuration per diver for extended operational duration
- Rapid cylinder replacement capability without interrupting diver supply
- Integrated filling valve with bleed and overpressure protection system
- Precision panel-mounted gauges for real-time cylinder pressure monitoring
- Compact, lightweight, transportable case
- Weatherproof, corrosion-resistant, and impact-protected construction
- Figure-of-eight umbilical storage system to prevent hose kinking and memory set
- Heavy-duty hose restraint system with secure BCD attachment
- 316 Stainless Steel quick-release pin carabiners rated to 35 kN
- Hose restraint load tested to 1,115 kg

### COMPATIBLE WITH

- Underwater communication systems
- SCADE (FFM & HMV) integration ready
- Supports multiple cylinder sizes
- Compatible with a range of BCD systems
- Fully customisable to meet specific client requirements

Built for reliability, safety, and rapid deployment in demanding environments.
